In the opinion of management, all adjustments consisting of normal recurring accruals considered necessary for a fair presentation have been included.

Standards issued but not yet effective

Standard issued during the period ended 31 March 2016 but not yet effective is listed below:

IFRS 16 – Leases

In January 2016, the IASB issued IFRS 16 Leases. The new standard requires lessees to recognise assets and liabilities for most leases on-balance sheet. Lessees applying IFRS 16 will have a single accounting model, with certain exemptions. Lessors applying IFRS 16 will classify leases using the same principle as in IAS 17 and lessor accounting is substantially unchanged.

IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Earlier application is permitted for entities that apply IFRS 15 Revenue from Contracts with Customers at or before the date of initial application of IFRS 16.

The Group intends to adopt this standard when it becomes effective. The Group is in the process of quantifying the impact of this standard on the Group's financial statements, when adopted.

14. FAIR VALUE OF FINANCIAL INSTRUMENTS

Valuation techniques and assumptions applied for the purposes of measuring fair value

The fair value of financial instruments traded in active markets (such as trading and available for sale securities) is based on quoted market prices at the reporting date. The quoted market price used for financial assets held by the Group is the current bid price.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date.

Fair value measurements recognised in the interim condensed consolidated statement of financial position

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- **Level 1** fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- **Level 2** fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- **Level 3** fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At the reporting date, unlisted equity investments with a carrying value of KD 2,150 (31 December and 31 March 2015: KD 2,149 thousand and KD 2,175 respectively) are carried at cost less impairment due to the non-availability of quoted market prices or other reliable measures of their fair value. Management believes that the carrying value of these equity investments approximates their fair value.

There are no transfers between levels during the periods/year ended 31 March 2016, 31 December 2015 and 31 March 2015.
